Blending unique and intimate testimony with immersive archive, [DESTINATION UNKNOWN](#) unveils the human stories underlying the events of the Holocaust.

These include one of the few escapees from the terror of Treblinka, and an exclusive interview with Mietek Pemper, who helped Oskar Schindler compile his List.

The film traces the narrow paths to survival, whether in hiding, fighting as partisans, or through enduring the camps such as Kraków-Płaszow, Mauthausen and Auschwitz-Birkenau. While a few managed to escape, most had to try to find a way to stay alive until the end of the war.

We see how they had to survive the chaos that came afterwards, and their attempts to build new lives. Their stories do not end with liberation.
